

SYNERGY SELECT CASE STUDY

# Young Galvanizing, Inc.

## OVERVIEW

For over 40 years Young Galvanizing, Inc., located in Pulaski, Pennsylvania has consistently provided the highest levels of zinc coating quality as well as service, receiving numerous awards and a reputation for quality within the galvanizing industry.

## CHALLENGES

Young Galvanizing needed assistance with overall injury frequency and severity, as well as the safety culture of the workforce.

## SOLUTIONS

Synergy worked with the internal team at Young Galvanizing to improve the safety culture and accountability through the loss prevention safety audits which identify high-risk activities and develop corrective actions to reduce exposure. In addition, a closer focus on claims handling was implemented through Synergy to effectively manage claims after an incident occurs to ensure proper treatment is administered, and employees are returned to work as soon as possible.

## RESULTS

- 48% decrease in incurred cost
- 19% decrease in average claim cost
- 100% commitment to transitional return to work

"Synergy helps us legitimately demonstrate we are 100% committed to having the safest environment possible."
