Synergy provides workers' compensation to the healthcare industry.

Our Safety Professionals become thoroughly familiar with your organization and serve as an extension of your workforce. We will conduct monthly visits to assist your organization in compliance, training and implementation of your individualized SOS Business™ Plan.

 **Conscientious**
We become thoroughly familiar with your business.

 **Hands-On**
We work proactively with HR to develop guidelines for future hires.

 **Innovative**
Comprehensive risk analysis & internal studies are used to develop a customized business plan.

Once your customized loss prevention business plan has been implemented we continue to refine your culture of safety by using the SOS™ model to focus on the specific changes and challenges that are unique to the healthcare industry and work to mitigate them which in turn reduce injuries.

In an effort to reduce or eliminate industry trends, our Safety Professionals are focused on the organization's housekeeping program, ensuring proper patient lifting equipment is available, and observing and training for proper patient transfer techniques, along with other safeguards.

The Safety Professional will address any safety concerns as well as provide recommendations and corrective actions based on monthly department safety audit findings.

Synergy will provide effective loss prevention services to help keep your workplace safe so you can focus on what you do best.

"I appreciate the team effort that we have with handling safety in our facility, on our grounds as well as handling the workers' comp claims when they happen. We've seen a big decrease in our safety costs and our workers' comp costs which has really helped us have success in our business." -Christy B., Healthcare Industry
