**Conscientious**  
We become thoroughly familiar with your business.

**Hands-On**  
We work proactively with HR to develop guidelines for future hires.

**Innovative**  
Comprehensive risk analysis & internal studies are used to develop a customized business plan.

Once your customized loss prevention business plan has been implemented we continue to refine your culture of safety by using the SOS™ model to focus on the specific changes and challenges that are unique to the manufacturing industry and work to mitigate them which in turn reduce injuries.

In an effort to reduce or eliminate industry trends our Safety Professionals are focused on the organization's fall hazards, machine hazards, lockout tagout (LOTO), material handling equipment, and safe work behaviors of all employees.

The Safety Professional will address any safety concerns as well as provide recommendations and corrective actions based on monthly department safety audit findings.

Synergy will provide effective loss prevention services to help keep your workplace safe so you can focus on what you do best.

“Synergy and SOS has brought awareness to leadership and the employees on Safety and handling incidents. They have provided us with education and training that has helped our workforce which has translated to a reduction in employee injuries and employees not being out of work. This has helped us reduce the burden for mandatory overtime, in turn, helping us to save money.” -**Gina D., Manufacturing Industry**
